

IBRF Honoured Rumane

International Benevolent Research Forum (IBRF), registered at Nagpur, India, is a Forum of Indian NGOs for cooperation with united nations. IBRF is a member of London Diplomatic Academy, the Federation of Indian Publishers and Indian Library Association, New Delhi, World Human rights Service Council, New York. IBRF is a group of like minded people, which includes Writers, Poets, Journalists, researchers, Doctors, Scientists, Social Workers, Engineers, Architects, Professors, Diplomats and other professionals from around the globe. IBRF's main objective is to work for International Understanding and Peace. Dr. Narayanam Narsimha murthy secretary and executive edutor of IBRF, during his recent visist to kuwait, honoured Abdul Razzak Rumane as Member-Board of Governors, and appointed him as honorary Vice Governor of IBRF. During his inaugural speech Dr. Murthy informed that IBRF is in the process of seeking recognition from United nations, which will enable it's members to participate as an observer in the United Nations.

THE TIMES, KUWAIT AUGUST 15, 2004

DUBAI - Traffic cops in the city will soon be carrying 'Pocket PCs' instead of traffic fine registers which will go into retirement after the introduction of an integrated electronic system, a traffic police official said. The move, according to police, comes as part of an overall police strategy aimed at replacing current methods with more advanced systems that could serve larger number of people and catch up with the pace of development in the city. "The new traffic system depends on a central database. More than 400 traffic department employees, working in the vehicle and driver licensing sections, will be directed to working in field assignments, that is in traffic planning and accident investigation, etc," said Colonel Ahmed Hamdan bin Dalmouk, Head of the General Directorate of Electronic Services at Dubai Police. It will be the first time in the

proof against the offender. These photos can be shown to the traffic offender if he or she raises any objections. Traffic accidents or any unacceptable driving behaviour by reckless drivers can also be photographed. For this reason, an integrated traffic computer system is being developed at the UAE level, in the same way as a unified criminal database and a unified immigration and residency system were set up. Since September 2002, the new traffic system started being developed at the instruction of police chief Lieutenant-General Dhah Khalfan Tamim. The system will handle a huge workload at traffic police departments. Col. Bin Dalmouk said some 3,000 transactions were processed daily at Dubai Traffic Police Department.
